

I am strongly opposed to BellSouth's petition to end regulation of broadband services. Thanks to the regulation, I am able to obtain superior service and quality from an independent ISP. Ending regulation would require me to a lower quality of service.

I value my Internet Service Provider (ISP) because of the great support. Having had a large phone company as my provider previously I know I always want to have choices in this marketplace. Please make sure the phone lines (and cable lines) are shared fairly with all ISPs.

Please dismiss BellSouth's petition. Thank you.
